

Cover Letter

May 15, 2026

Dear Hiring Manager,

I am writing to express my enthusiastic interest in the IT Service Management position at CHIP MONG Bank. As a Sophomore Computer Science student at Western University, I am eager to translate my academic foundation into practical experience and contribute to your technical team.

While I am currently building my professional IT experience, my background has instilled in me a strong work ethic and a dedication to problem-solving. In my computer science coursework, I have learned that the answer isn't always immediately apparent. However, I pride myself on my persistence; I do not give up easily and I am committed to researching and testing solutions until I reach the correct result. This determination to "debug" problems is a mindset I plan to bring to your IT infrastructure.

Additionally, my tenure as a Barista at Amazon Café has sharpened my soft skills, which I believe are crucial for user support and administration. Working in a fast-paced service environment taught me how to collaborate effectively with a team, manage time under pressure, and maintain a positive attitude while solving customer issues. I am a fast learner who adapts quickly to new workflows, and I am confident I can apply this same flexibility to learning your specific server and network protocols.

I am looking for an opportunity where I can work hard, learn from mentorship, and prove my value to the team. I have enclosed my CV for your review and would welcome the chance to discuss how my dedication and energy would make me a great fit for your company .

Thank you for your time and consideration.

Sincerely

SOK THAVIREAK

Mr. SOK THAVIREAK

CURRICULUM VITAE

Mr. SOK THAVIREAK

Sophomore at Western University
Apply for IT Service Management

PERSONAL PROFILE

Gender : Male
Date of Birth : 26th November 2005
Place of Birth : Phnom Penh, Cambodia
Nationality : Cambodian
Marital Status : Single
Address : Sangkat Kork roka, Khan Prakphnov, Phnom Penh
Phone : 097 631 1421
Email : thavireaksok@gmail.com

EDUCATION BACKGROUND

Present : Continuing Bachelor Degree of Computer Science at Western University.

2026 : Certificate of Completion: The Complete Full-Stack Web Development

Bootcamp Udemy (Instructor: Dr. Angela Yu)

2022-2023 : Graduated High school At Cheasim Chhukva.

LANGUAGES

Khmer : Mother Tongue

English : Medium (Speaking, Writing, Listening, and Reading)

PERSONALITY AND INTERESTS

Personality : Try hard, Responsible, Positive, Honest, Open-mind, etc.

Interest : Read Book, writing and Travelling

PROFESSIONAL EXPERIENCE

Barista

Amazon café | Jan 2023 – Jul 2024

- Worked in a fast-paced service environment, managing time under pressure.
- Maintained a positive attitude while collaborating effectively with a team and solving customer issues.

IT Officer

SFL international School | Jul 2024 - Jul 2025

- Supported faculty, staff, and students with daily technical issues and maintained all computer lab hardware and software.
- Assisted in campus-wide network administration, ensuring secure and reliable internet connectivity for all users.
- Maintained detailed records of IT inventory, managed hardware lifecycles, and drafted technical documentation for internal processes.

IT Administrator

AetherFlow Global Customs Clearance Services Co., Ltd. | Present (Early 1 Year)

- Administer and maintain corporate hosting servers, manage email sharing systems, and regularly update the company website to ensure optimal online performance.
- Manage local network infrastructure, including the configuration and monitoring of routers and switches via web-based user interfaces, to ensure stable and secure connectivity.
- Provide comprehensive IT support by troubleshooting software and hardware issues, alongside performing hands-on maintenance and repairs for office equipment like printers.
- Configure, monitor, and maintain the organization's CCTV security infrastructure to ensure continuous system reliability and safety.

TECHNICAL SKILLS

- **Web Development:** HTML, CSS, Tailwind, JavaScript, Node.js, Express.js, React.js, PostgreSQL.
- **IT & Systems Administration:** System Administration, Local Server Management, Hosting Server Management, Networking, Hardware & Software Troubleshooting, Remote Support, Software Installation & Patch Management.
- **Multimedia & Design:** Graphic Design, Video Editing, Camera Operation (Videography), Adobe Photoshop.
- **Security & CCTV:** CCTV Installation & Configuration Certified, IP & Analog Camera Setup, DVR/NVR Configuration & Troubleshooting, CCTV Maintenance & Repair.
- **Tools & Hardware:** Microsoft Office, Printer Technician (Basic).

PERSONAL PROJECTS & OPEN SOURCE

Sushi Store & Inventory System (EJS) [[https://github.com/ SokThavireak/sushi_store](https://github.com/SokThavireak/sushi_store)]

Live Demo : [<https://sushi-e-commerce.onrender.com>]

- **Technologies:** Node.js, Express.js, PostgreSQL, EJS, Passport.js (Local & OAuth2), Cloudinary.
- **Full-Stack E-Commerce:** Built a responsive customer storefront for browsing products, filtering categories, and cart management.
- **Advanced Authentication:** Integrated Passport.js to support both traditional encrypted local logins and Google OAuth2, backed by secure, database-persisted sessions.
- **Multi-Role Admin Dashboard:** Developed a secure backend system with Role-Based Access Control (RBAC) for Admins, Managers, and Cashiers to manage orders, perform CRUD operations on products, and process Point-of-Sale (POS) checkouts.
- **Cloud Media Management:** Integrated Cloudinary API with Multer to automatically handle, optimize, and host uploaded product images.
- **Payment Integration:** Created a demo QR payment system that processes transactions and dynamically updates order status in the PostgreSQL database.

Key Upgrades from your Old Details (What makes this stand out)

1. **You added OAuth / Google Login:** Mentioning passport-google-oauth2 is a big plus for modern web development.
2. **Cloudinary Integration:** Storing images in the cloud instead of locally is a highly sought-after real-world skill.
3. **Role-Based Access Control:** You aren't just doing "Admin vs User" anymore; you have a complex hierarchy (manager, cashier, etc.), which shows you understand enterprise-level authorization.
4. **Database Sessions:** Using connect-pg-simple means your app is scalable (if the server restarts, users don't get logged out).

Sushi Store Modernization (React & API Conversion) | In Progress

- **Technologies:** React.js, Node.js, Express.js, PostgreSQL, ABA PayWay API.
- **Frontend Architecture:** Currently migrating the legacy server-side rendered EJS application into a modern Single Page Application (SPA) using React, significantly enhancing UI responsiveness and component reusability.
- **API Development:** Decoupling the frontend from the backend by restructuring existing Express.js routes into a robust, scalable RESTful API architecture.
- **Payment Integration:** Integrating the ABA PayWay checkout API to handle digital transactions. Implementing custom cryptographic hashing algorithms and redirection handlers to securely process transaction payloads and modernize the checkout experience.

Full-Stack Human Resources Management System (HRMS)

Link Github: [[https://github.com/ SokThavireak/sushi_store](https://github.com/SokThavireak/sushi_store)]

Live Demo : [<https://sushi-e-commerce.onrender.com>]

- **Technologies:** Java, Spring Boot, React.js, PostgreSQL, Spring Security (JWT), Tailwind CSS, REST APIs.
- **System Architecture:** Engineered a decoupled, enterprise-grade full-stack application featuring a scalable Spring Boot backend and a responsive React Single Page Application (SPA) to manage complex HR operations.
- **Security & Authorization:** Implemented robust Role-Based Access Control (RBAC) using Spring Security and JSON Web Tokens (JWT), ensuring secure routing and distinct, restricted dashboard environments for Admin and Employee roles.
- **Core HR Modules:** Developed interconnected modules for comprehensive employee lifecycle management, including real-time Attendance tracking, structured Leave request workflows, dynamic Payroll processing, and Performance evaluations.
- **Administrative Control:** Built an extensive administrative control panel allowing HR managers to perform full CRUD operations on departments, organizational positions, and user profiles, backed by comprehensive system activity logging.

Key Strengths to Highlight in Interviews for this Project

1. **Java & Spring Boot:** This is a major enterprise technology. Mentioning Spring Security and RESTful API design makes you highly employable for corporate backend roles.
2. **Decoupled Architecture:** Unlike your older EJS project where the frontend and backend were heavily mixed, this project separates the React frontend from the Java backend, which is how modern industry apps are built.
3. **Complex Business Logic:** Handling payroll, leave approvals, and performance reviews requires much more complex database relationships than a simple e-commerce store.

TECHNICAL PROJECTS

SFL Cambodia - Static Web Interface [<https://sflcambodia.com/>]

- **Technologies:** HTML5, CSS3, JavaScript, Bootstrap 5.
- **Front-End Development:** Architected a fully responsive landing page for an educational institution, ensuring cross-browser compatibility and mobile optimization.
- **UI/UX Design:** Implemented modern design principles using Bootstrap to create a professional user experience with custom navigation, hero sections, and organized content layouts.
- **Clean Code Practices:** Focused on semantic HTML and optimized CSS to ensure fast loading times and easy maintainability.
